Questions frequently arise about the use of the cameras we installed app two years ago. They are used frequently throughout the month. Below are two examples from this past month. The first showing the condition of traffic signals during a crash where no witnesses came forward. It allowed for fault to be determined.

This photo was captured on Center Square when the offending vehicle passed a stopped school bus. After obtaining a tag number the driver was cited for the violation.

To date radar speed sign has been used on:

- Baltimore St x2
- Leitersburg St x2
- S Washington St
- N Allison St x2

The average time at the site varies between 2 and 3 weeks depending on the status of the display.

Operation on Baltimore St (in the 25 MPH zone) has shown speeds of 32 and 34 mph at the 85%ile.

N Allison St has shown a speed of 39 mph at the 85%ile.

The device is continuing to be placed in locations where there are problems as both a traffic calming measure and to determine times of highest violations.

ENRADD has been used 3 times in the past 3 months resulting in app 8 citations. ENRADD is only used when two Officers are on duty. Officers continue to use Chronometers Borough wide for additional enforcement.
